Worms, 7 October 2013

Dear Sir or Madam,

Many of my patients take the opportunity to visit the KönigsSalzSALARIUM® at “Salzkammer Worms”

The benefactors of visiting the KönigsSalzSALARIUM® are, in particular, patients suffering from:

- Acute and chronic respiratory diseases
- Common colds
- Acute and chronic coughing
- Bronchial asthma
- COPD/chronic bronchitis
- Allergies
- Hay fever and other forms of allergic coryza
- Sinus infections (sinusitis)
- Skin diseases such as neurodermatitis, psoriasis and acne
- Cystic fibrosis
- Sleep disorders
- Depression and burn-out syndrome

The main positive effects that I can confirm from the regular visits paid by my patients to the SALARIUM® include...

The mild way in which the mucous membrane and respiratory passages are moistened and the blood flow in this area is enhanced.

This is made possible due to the very fine salt spray that allows the particles to penetrate as far as the pulmonary alveoli.

As a result, patients find coughing easier as the secretion fluidifies in the respiratory passages and promotes the self-cleansing mechanism.

The regular visits to the SALARIUM® have enabled some of my patients to reduce or suspend the need to take medication.

However, healthy people, and children in particular, also benefit from the preventive and protective effects that result from strengthening the mucous membrane of the bronchial tubes. This natural immune system is stimulated and supported.

We are very pleased that we opted to have a KönigsSalzSALARIUM® built.

Yours faithfully,
Dr. Max Apprich
